OVERVIEW

Using only high-quality aluminium and stainless steel parts, the system is built for New Zealand's harsh environment.

02

Manual crank handle or motorised to suit any application.

Built to handle high winds, with a strong bottom bar and open side channels to release wind pressure.

Header box and flashing options are available for a seamless finish, enclosing all moving parts.

SIMPLE SCREEN

THE PROCESS

PROJECT CONSULTATION AND MEASUREMENT

Your local installer will visit and review the outdoor space, understand where you would like to have screens and offer advice for what is the best option. They will then take all the measurements they need and provide a quote.

2 CONFIRMATION AND MANUFACTURING

Once all options and details have been chosen and the final quote is approved. The screen will be ordered and pre-assembled by the installer. This will then allow the screen to be installed quickly on site.

3

INSTALLATION

When suitable, the local installer will then install the simple screen in location. Making any final adjustments and ensuring you are completely satisfied with the final outcome.

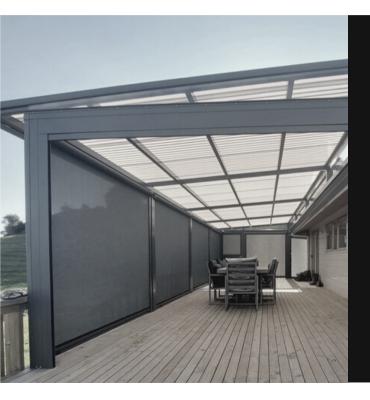

GALLERY

From large commercial and residential spaces to small privacy or shade screens. We have a simple solution for any situation, allowing you to maximise and enjoy your outdoor areas.
