ENJOY YOUR OUTDOORS

SLIDETRACKNZ.COM

Why Choose Slidetrack?

Slidetrack is a popular outdoor blinds brand originating in Australia known for its durability and style. Now Manufactured in New Zealand using advanced manufacturing processes and patented parts that continue to be both a favorite for installers and customers.

Our blinds are designed to withstand harsh weather conditions and offer reliable protection for outdoor spaces. With high-quality materials and manual or motorised options, Slidetrack systems can create the perfect outdoor solution for any area.

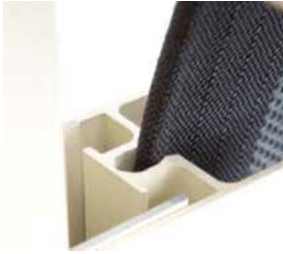

Our products protect from rain, hail and wind turning outdoor spaces into functional and modern living areas for year-round enjoyment.

**Protection from
The Elements**

**Reliable, Proven
Performance**

Key Features

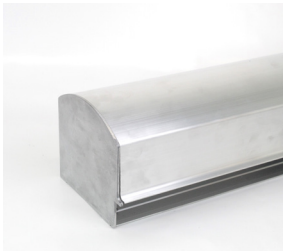

Unique Track System

The side channels are specifically engineered to guide the movement of the blinds, keeping them in place and preventing swaying or banging against the wind. Not only that, but they also serve as a barrier against insects and other unwanted pests from sneaking into your outdoor living space. The best part? These track guides are custom-built for each blind, ensuring a perfect fit every time.

Local & Experienced Installers

With modern manufacturing facility located in New Zealand, we guarantee exceptional quality control and quick response times when producing Slidetrack screens. Our team carefully selects and trains experienced installers nationwide, ensuring that our product surpasses all other screen systems available in the market.

Quality Components

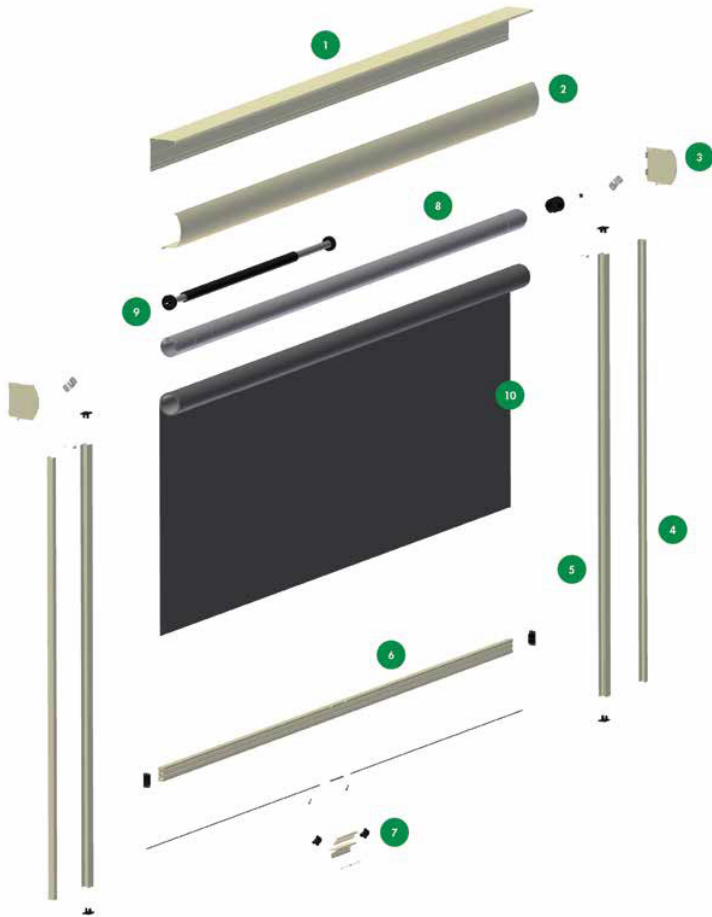

Slidetrack outdoor screens are designed to be long-lasting, with minimal plastic components. Our standard system includes heavy-duty top tubes and a bottom bar for added durability. Optional motors are designed to provide smooth efficient operation, allowing easy control of the blinds with just a push of a button. Tested and proven in New Zealand's harsh climates

Reliability

You can rest assured that we've got you covered – quite literally. Our blinds are built to withstand the toughest weather conditions, ensuring they stay intact and functional for years to come. Whether it's scorching heat, heavy rain, or strong winds, our outdoor blinds are designed using high-quality materials that offer exceptional durability and resilience

System Overview

- | | |
|-----------------|-----------------------|
| 1 Headbox back | 6 Bottom Bar Assembly |
| 2 Headbox front | 7 Ezylift Latch |
| 3 End plate | 8 Axle Assembly |
| 4 Channel | 9 Spring |
| 5 Side Track | 10 Skin |

The Process

Project Consultation and Measurement

Your local installer will come to your location to assess the outdoor area, discuss your preferences for screen placement, and offer expert recommendations. After evaluating the space, they will take precise measurements and provide you with a detailed quote for the installation.

Confirmation and Manufacturing

Once all options and details have been selected and the final quote has been approved, your project will proceed to our manufacturing process. Your screen will be custom-made and professionally assembled within 1-3 working days. This will ensure that the screen is ready for quick installation on site by your local Slidetrack installer who has been trained specifically.

Installation

Your local installer will then organise a time to complete the Slidetrack installation, making any final adjustments to ensure your complete satisfaction with the final outcome.

Ongoing Care & Maintenance

Your blinds should be cleaned whenever visible dust build-up occurs, and a soft-bristle brush dipped in a bucket of clean water or connected to a hose works well. A soft cloth can be used to dry off PVC blinds. It is important that the Slide track grooves are lubricated using silicone from a spray can with a nozzle at least four times a year and particularly following rain, to restore lubricity to the side spline. Only silicone is recommended.

Warranty

Slidetrack Blinds come with a limited warranty that covers the materials used, provided they are installed correctly and used under normal operating conditions. For specific details on what is included in the warranty and the relevant time periods, or for more information on how to operate and maintain the blinds, please reach out to your retailer for assistance.

It is important to be cautious of high winds when using Slidetrack Blinds. These blinds have been successfully utilized in numerous locations throughout Australia and New Zealand. However, for blinds that are larger than 7.5 square meters, it is recommended to always retract them during stormy weather.

| Components | Motor | Remote Control | Clear PVC Screens | Mesh/Fabric Screens |
|------------|---------|----------------|-------------------|---------------------|
| 2 Years | 5 Years | 2 Years | 2 Years | 10 Years |
